# **1 Introduction**

## **1.1 Problem Statement**

Develop a website on the topic Career Guide by using HTML(Hypertext Markup Language) and CSS(Cascading Style Sheets).the website should be interactive and responsive.

## **1.2 Project Objectives**

The objective of making a web page on career guide is to help people to choose their wisely for the better future.as many people got confused after during their study time what to do or what not to do next.,so this website will provide a perfect guidance and counseling for these people to make their future life good.

## **1.3 Project Scope**

The Career Guide website will the way careers are planed.With this website student from different courses can get guidance from Career Guide with minimum fee.the website will provide different types of tests which will help to plan the career.If a person visits this website in search of any type of career advice will not be disappointed by this website and will be benefited.

## **1.4 Goals**

By looking around in the society we found that some people still doesn't like their jobs,stream in which they are studying and with their branches.We concluded that that is because of no guidance,so we thought that why not help them and as we all know internet is the best place to help others or to take help from others so we [1] build a website to help these kind of people.

## **1.5 Assumptions**

For the users of this website[1]. we assumed that user is at least 10th pass seeking for the general Career guidance.

## **1.6 Constraints**

Since JavaScript is not known to us so the data which will be entered will not reach the website operator from the user this problem will be solved in the future.this webpage will work fluently on desktop mode but it will not work on mobile.

## 2 Project Plan

### 2.1 Project Plan

**Table 1:** Project Plan

S.No.	Task	Start	Finish	Source
1.	Homepage	12 Nov	19 Nov	pdf,internet
2.	login form	12 Nov	19 Nov	pdf
3.	Navigation	12 Nov	19 Nov	
4.	Button1-6	12 Nov	19 Nov	
5.	copyright page	12 Nov	19 Nov	Internet
6.	About Us	12 Nov	19 Nov	Internet
7.	Footer	12 Nov	19 Nov	

### 2.2 Task Sheet

**Table 2:** Task Sheet

S.No.	Task	Start	Finish	Person Allotted
1.	Homepage	12 Nov	19 Nov	Deepak,suraj
2.	login form	12 Nov	19 Nov	suraj
3.	Button1-6	12 Nov	19 Nov	Deepak
4.	Navigation	12 Nov	19 Nov	suraj
5.	copyright page	12 Nov	19 Nov	suraj
6.	Footer	12 Nov	19 Nov	Deepak

### 2.3 Project Management Approach

#### 2.3.1 Project Roles and Responsibilities

The project and responsibilities which was given to the individuals to perform or to complete for the whole combine project was done by the member sincerely and on time without any done which help the task to be completed on time

## 3 Requirement Analysis

### 3.1 Purpose

CareerGuide.com a one-stop platform which answers your What, Where, Why and How's of all your career related questions. ### 3.2 Intended Audience and reading suggestions

The intended audience are under graduate students pot graduate students and some with higher degree. Audiences or the website user will have to fill or give a brief information about themselves of their interest and academic qualification and some of thier future plan so that that can be analysed and we can give them a possible path to follow to achieve their goals.

### 3.3 Project Scope

By looking around in the society we found that some people still doesn't like their jobs,stream in which they are studying and with their branches.We con- cluded that that is because of no guidance,so we thought that why not help them and as we all know internet is the best place to help others or to take help from others so we[2] build a website to help these kind of people.

### 3.4 Technology Used

For the development of the project HTML(Hypertext Markup Language) with the use of CSS(cascading style sheet) were used.Notepad was used to write the code for the website.Google Chrome was use to check the .html file progress i.e. how it looks after any change or adding of any new code.

## 4 Design Website

### 4.1 Topic And Their Brief Explanation

#### 4.1.1 Introduction

Figure 1: Career Guidance

1. The home page of the web page will contain the a short introduction(??) to the we page and guidance to surfer the web page efficiently.
2. Below introduction the web page will contain some buttons which will link to the another web page i.e.
  - An engineering branch selector tool[?] for the student in which a form will be there for the student and enter data like their interest in any branch,mark obtained in various subjects. based on those data it will suggest some branches option for the user which may be useful for the user,whose link will be provided on the front/main main of the website.
  - A stream selector for for the student after class 10th
  - Commerce career selector for the students of class 11th 12th b.com i.e. which career to select for example:CA ,management,etc.
  - A stream selector test will be their on the web page will provides the user to take the online test and choose their further study stream.
3. After the above hyperlinks the web page will have some links to the frequently asked questions about the career guide clicking on them will open a new tab of web page which will the the precise answer for the same question[3].

### 4.2 Top Career Councilors

This division will contain some sub division will will show the top career councilors of the month so that it will be easy to find the best counselling from the best and utilise it for the better career
